

Changing the Way Your Company Processes Employee Time & Attendance

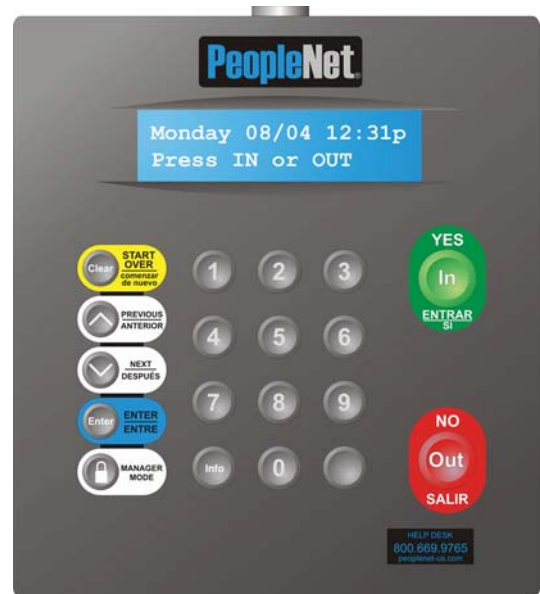

Time Tracking & Processing Solutions

Delivering a PAPERLESS environment!

PeopleNet offers a fast and easy process for employees to clock in and out utilizing the PeopleNet PENDO Clock. All punches are stored on the clock until punches are transmitted to the PeopleNet Data Center. The clock communicates to the data center on 30-second intervals, providing accurate and current punch information to the appropriate PeopleNet users.

The clock communicates via a standard Ethernet connection and the Internet to PeopleNet's communication server. All punches are "pushed" to PeopleNet using HTTP/HTTPS protocol. There is no polling of the clocks; thus eliminating additional manual steps and security issues.

PeopleNet PENDO Clock

Product Description

- Ethernet and Wireless (Sprint, Verizon) connectivity to PeopleNet
- PIN entry for fast, efficient & user friendly time capture
- Optional Printer Available; Print time cards and missing punches
- Dynamic or Static IP
- Lower your cost to efficient time capture
- Simple to learn, easy to use and cost effective

* Requirement(s): Power Supply and Ethernet connection or Sprint/Verizon Card for Wireless Connection
